SPEEDING DOESN'T SAVE YOU TIME

But It Could Cost You Everything

THE MYTH:
"If I speed, I'll get there faster."

THE TRUTH:
Speeding barely saves time—and puts you (and others) at serious risk.

Let's Break It Down:

Trip Length	Going 55 mph	Going 65 mph	Time Saved*
5 miles	5 min. 27 sec.	4 min. 37 sec.	Less than 1 min.
10 miles	10 min. 55 sec.	9 min. 13 sec.	1 min. 42 sec.
20 miles	21 min. 49 sec.	18 min. 27 sec.	3 min. 22 sec.

*Based on ideal conditions with no stops, lights, or traffic

You risk a crash, a ticket, or worse—for what? It's a high risk for a low reward.

But Here's What You *Do* Get When You Speed

- More likely to get pulled over or fined
- Higher chance of a crash, severe injuries, and even death
- Longer stopping time and less control
- Delays from crashes or traffic stops

Think About It

Saving a minute or two isn't worth someone's life—including yours.

Smart Move

Leave earlier. Drive smarter. Get there safely.
