

Richlands Interchange

The Richlands Interchange project is being considered to help relieve traffic congestion and provide better I-64 access to and from the Lewisburg area. The West Virginia Division of Highways (WVDOT) is currently studying traffic habits and patterns within and around Lewisburg. Adding an interchange at the proposed US 60 or CR 60/12 location would provide additional access to US 219 near the southern end of Lewisburg. The conceptual plan consists of constructing a new interchange at the Interstate 64 and US 60 crossover at Richlands or the Interstate 64 and CR 60/12 crossover. To date, this has been a planning-level study.

The conceptual alternatives include the following:

1. Construction of a diamond interchange at the US 60 crossover outside existing right-of-way;
2. Construction of a diamond interchange at the US 60 crossover inside existing right-of way;
3. Construction of a diamond interchange at the CR 60/12 crossover outside existing right-of-way;
4. No-Build alternative.

Alternatives 1-3 include the construction of a Park and Ride facility.

Option No.	Right-of-Way Cost*	Construction Cost	Total Cost**
1	\$600,000	\$7,400,000	\$8,000,000
2	\$60,000	\$11,540,000	\$11,600,000
3	\$1,000,000	15,800,000	\$16,800,000
4	\$0	\$0	\$0

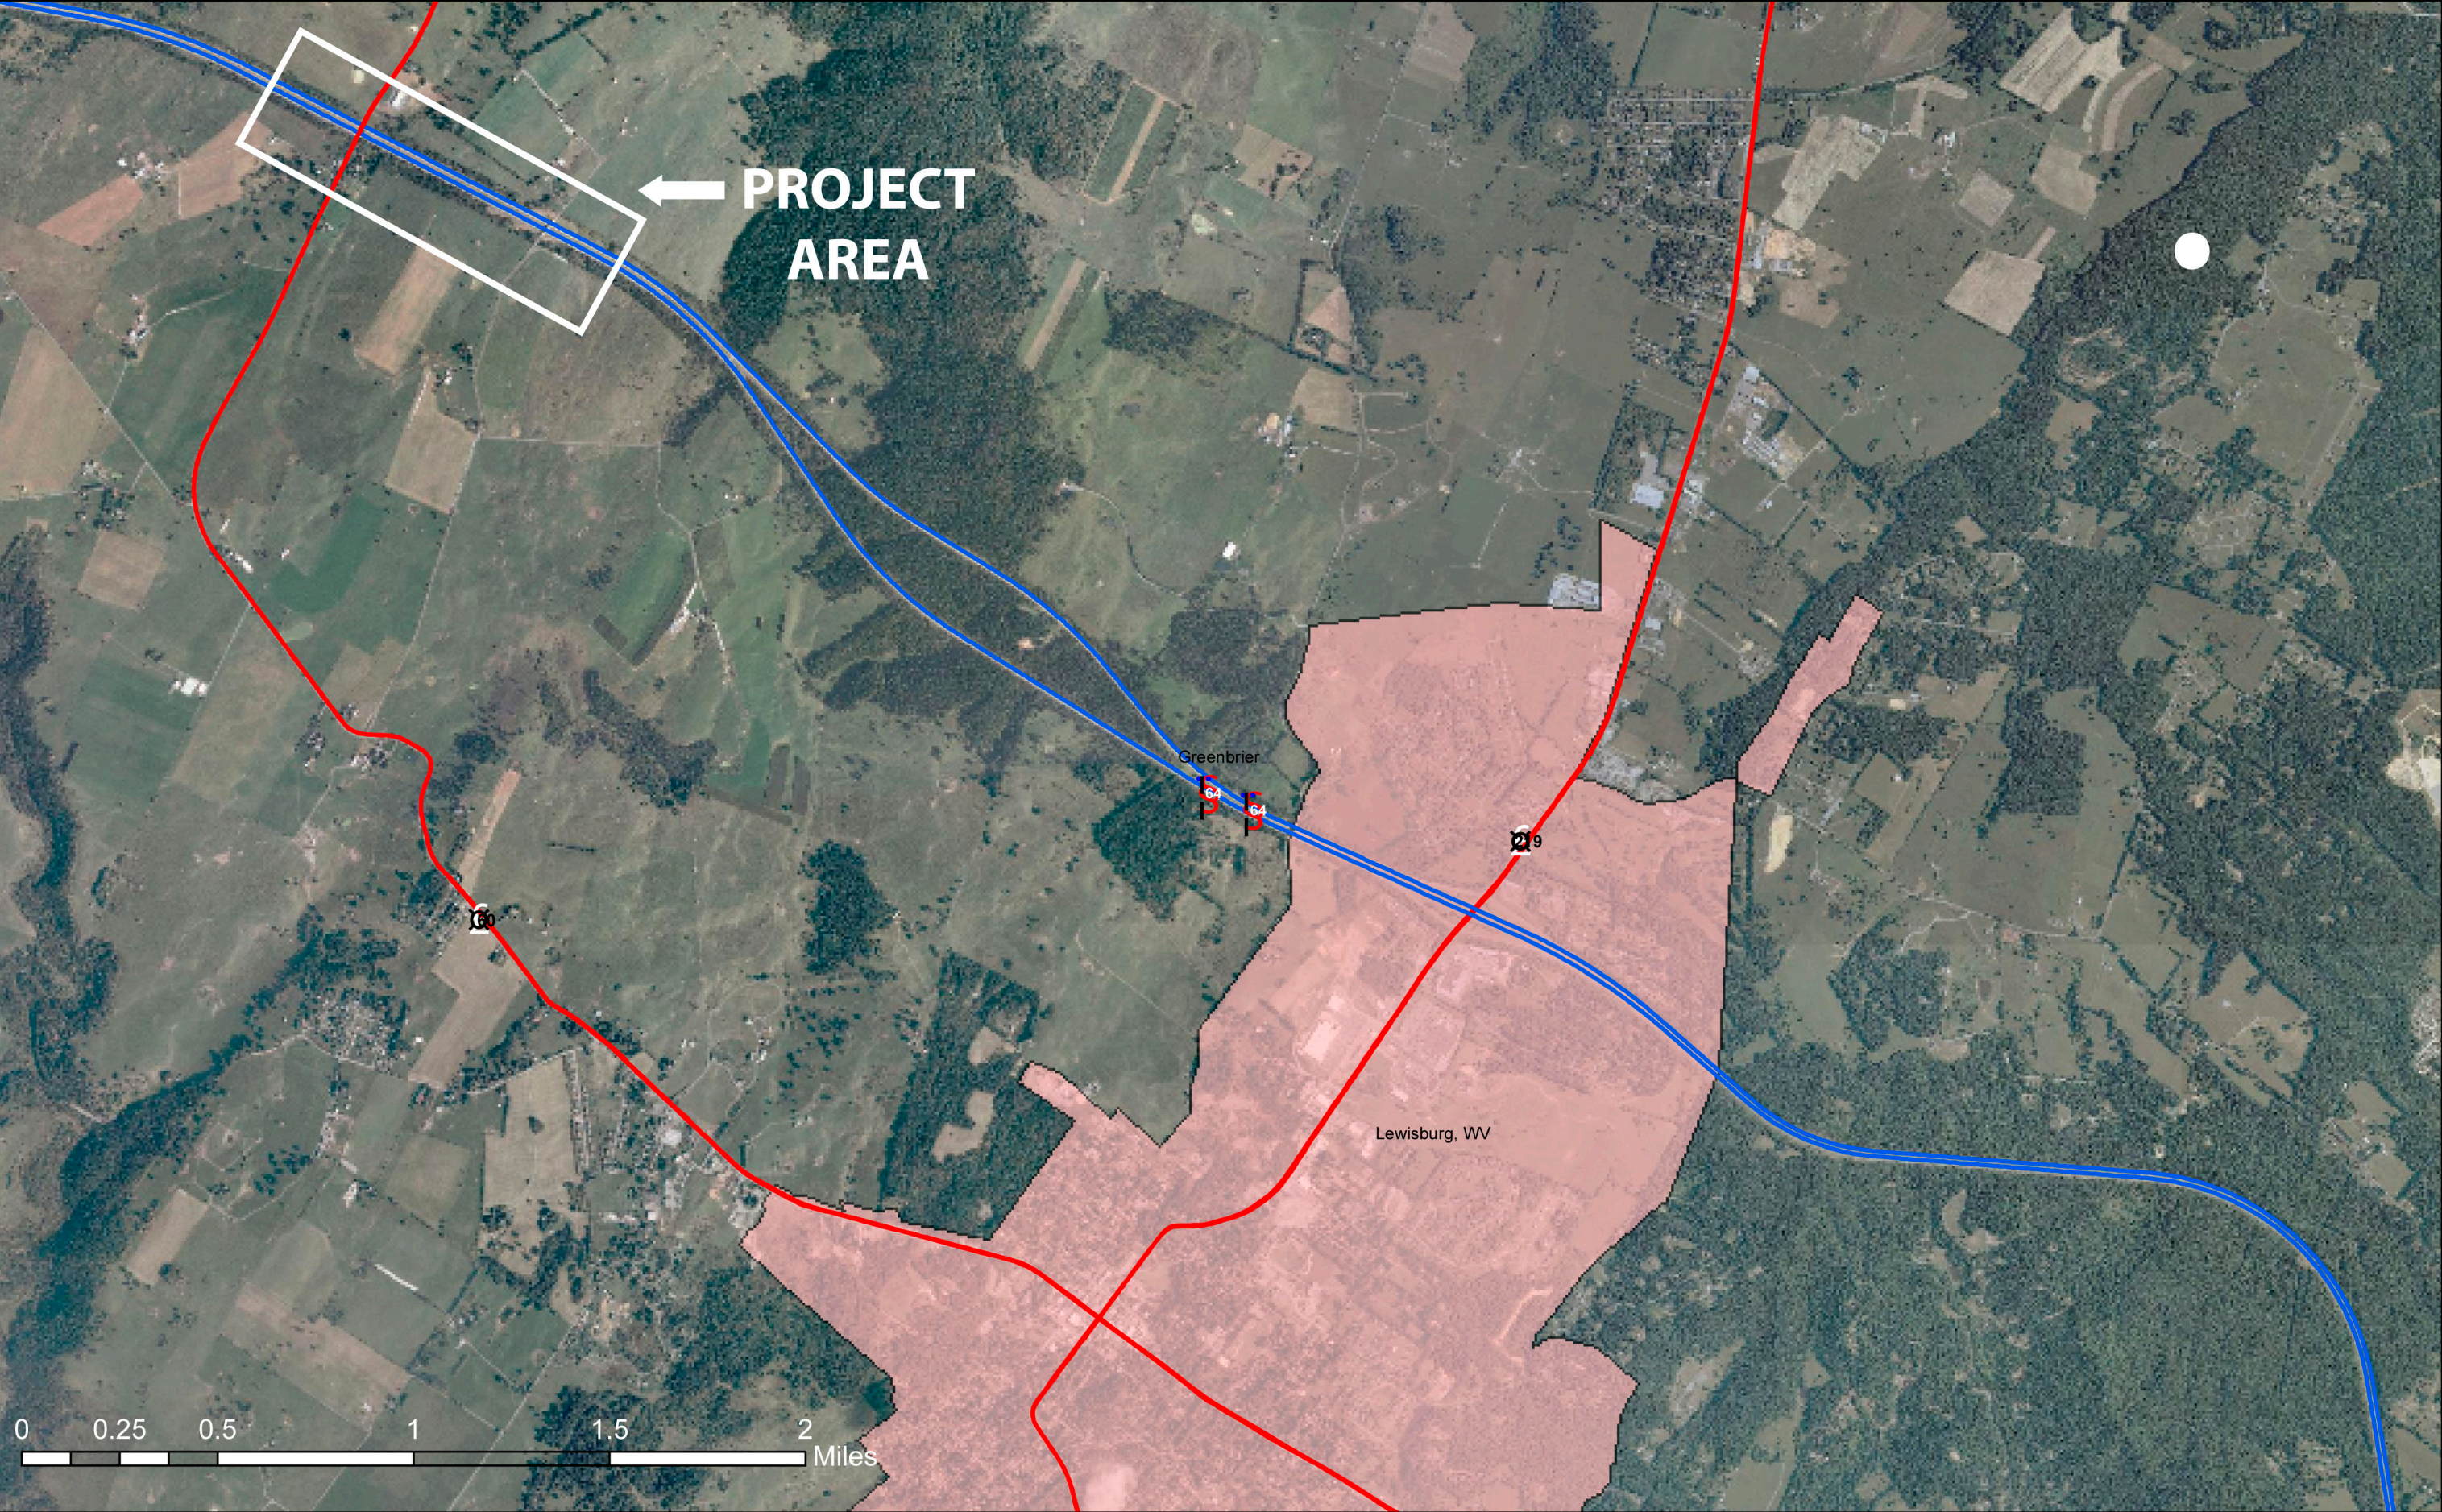

***Right-of-way costs include utilities relocation.**

****Costs are approximate.**

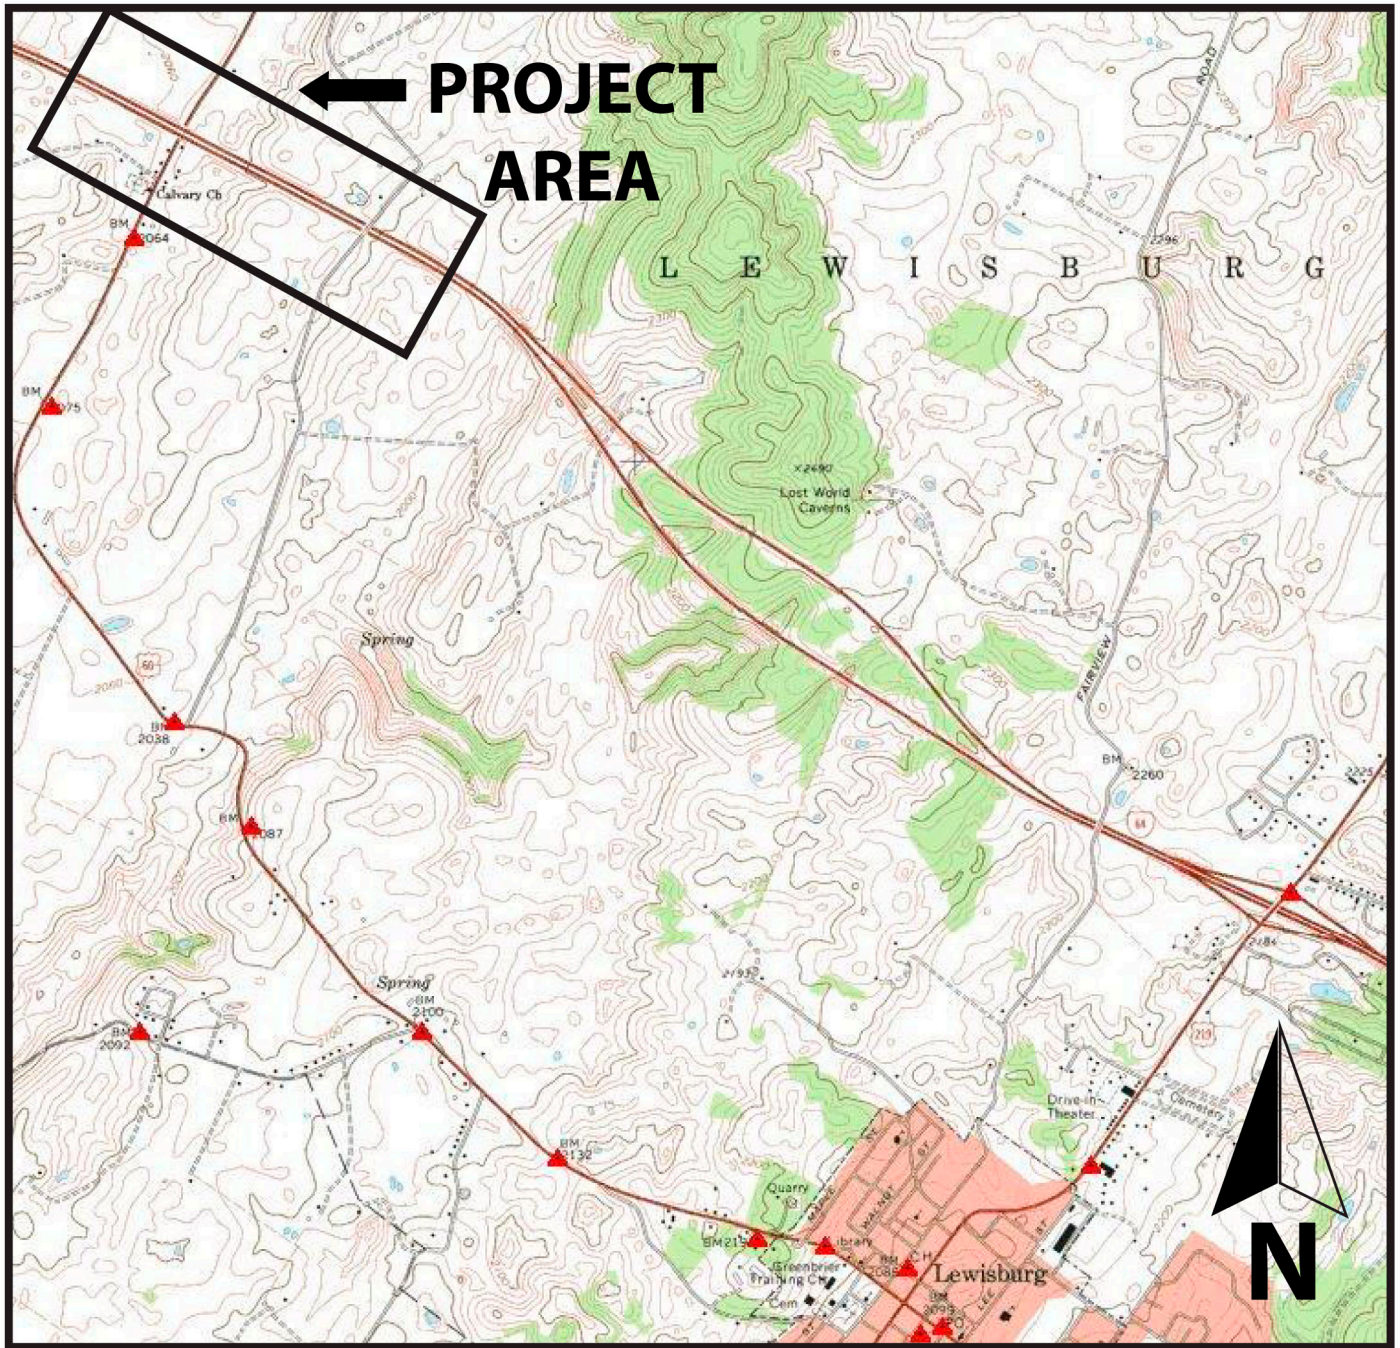

Your comments are important. Comment sheets will be provided at the workshop; they may be dropped in the comment box at the workshop, or mailed to:
